ZEESHAN FAIZ

Network Infrastructure Engineer

Tendlergasse 12/1, 1090 Wien, Austria | +43 677 62050993 | zeeshanfaiz80@gmail.com | linkedin.com/in/zeeshan-faiz

Professional Summary

Network Infrastructure Engineer experienced in designing, deploying, and managing secure enterprise network infrastructures across multi-site, high-availability environments. Skilled in multi-vendor firewall security (FortiGate, pfSense, OPNsense, MikroTik), routing and switching (OSPF, MPLS, BGP peering), virtualization (VMware ESXi, Proxmox VE), and full-stack monitoring (Graylog, Zabbix, SolarWinds, Nagios). Proven track record of leading technical teams and delivering structured incident response with measurable SLA outcomes.

Technical Skills

Firewall and Security
FortiGate, pfSense, OPNsense, MikroTik, Sophos, IPsec VPN, SSL VPN, IPS/IDS, DPI, Zero Trust, NAT/SNAT/DNAT, ACLs, RADIUS, TACACS+, DDoS Mitigation, SSL Inspection, Port Security, DMZ Design, Traffic Filtering, Firewall Policy Hardening, Network Segmentation

Routing and Switching
OSPF, EIGRP, RIP, MPLS, VRF, BGP Peering, iBGP/eBGP, SD-WAN, VLANs, STP/RSTP/MSTP, Inter-VLAN Routing, PBR, QoS, EtherChannel, LACP, Route Redistribution, Static Routing, Floating Routes, HSRP/VRRP, Link Aggregation

Virtualization
VMware ESXi, vSphere, Proxmox VE, Hyper-V, KVM, Veeam Backup and Replication, Snapshot Management, Disaster Recovery

Monitoring and Observability
Graylog, Zabbix, SolarWinds, Nagios, PRTG, LibreNMS, CheckMK, FortiAnalyzer, Wireshark, SNMP, Syslog-NG, NetFlow

Linux and Sysadmin
Ubuntu, Debian, CentOS, Bash Scripting, Cron Jobs, Systemd, SSH, tcpdump, nmap, netstat, iptables, File Permissions, User and Group Management, Service Management, Package Management (apt/yum), Log Analysis, Process Monitoring, Network Diagnostics

Microsoft and Collaboration
Microsoft 365, Azure AD, Intune, Exchange, Active Directory, JIRA, ServiceNow, Slack

Wireless and Physical
Ubiquiti AirFiber, PowerBeam, LiteBeam, Wi-Fi 6, MikroTik CAPsMAN, FortiAP, Meraki AP, RF Planning

Education

MSc Information and Communication Engineering
TU Wien, Vienna
Oct 2024 – Present

BS Telecommunication and Networking
COMSATS University
2014 – 2018

Languages

English C2 Proficient

German A1 (improving)

Soft Skills

Team leadership, CEO-level reporting, structured RCA, SLA prioritization, technical documentation, vendor management, junior mentoring

Work Experience

Associate IT Support Manager — *Jan 2025 – Mar 2025*
Topgolf Wien, Greenerb Austria GmbH — Vienna, Austria

- Deployed and stabilized Meraki network (2 firewalls, 30 switches, managed APs) with VLAN segmentation, PBR, load balancing, and CCTV across 4 floors.
- Maintained Oracle hospitality ecosystem (30 POS terminals, 100+ payment devices, 50 mobile tablets, KDS) with zero service interruptions during peak operations.
- Administered SAVI server controlling venue-wide lighting, audio, multi-display screens, and IPTV connected to 2 satellite providers.
- Administered Microsoft 365, Intune, Exchange, JIRA, and ServiceNow; deployed Graylog log management complementing Nagios for full-stack observability.

Senior Network Engineer — *Oct 2022 – Sep 2024*
Superior Connection Pvt. Ltd. — Lahore, Pakistan

- Secured multi-entity enterprise network (media channels, universities, medical institutions, aviation center, corporate clients) ensuring 24/7 high-availability connectivity.
- Enforced FortiGate, pfSense, and OPNsense firewall policies with IPS/IDS, SSL inspection, and Zero Trust controls; achieved zero critical breaches throughout tenure.
- Managed NAS and virtual server infrastructure ensuring high availability of business-critical services and structured data protection.
- Resolved complex faults (BGP instability, link flaps, firewall mismatches) via structured RCA, cutting restoration time by 35%; reported to Manager Neworks.

Network Engineer — *Apr 2021 – Sep 2022*
UPNET Pvt. Ltd. — Okara, Pakistan

- Architected full multi-site network infrastructure from ground up, onboarding 500+ clients with 99.9% access layer uptime.
- Deployed Juniper core routers and MikroTik CCR devices enforcing QoS, NAT, DPI, and a 3-tier Cisco distribution switching layer with structured VLAN database.
- Built 4-node HP Gen 11 cluster (Proxmox VE, VMware ESXi) hosting Linux VMs for monitoring (Graylog, Zabbix, Syslog-NG) and business apps (ODOO CRM, QuickBooks).
- Led 6 NOC and 12 field engineers; managed multiple upstream providers; reported to Manager Network.

Network Support Engineer — *May 2019 – Apr 2021*
Web Concepts Pvt. Ltd. (Connectel) — Lahore, Pakistan

- Monitored 2 Cisco Nexus BGP routers, 8 MikroTik CCR bandwidth managers, 120 distributed nodes, and 50+ servers including CDN and VoIP platforms.
- Configured QoS, NAT, DNAT, inter-VLAN routing, ACLs, and DPI; provisioned client segments end-to-end and produced weekly health reports across 120+ nodes.
- Sustained 99%+ network availability using SolarWinds, PRTG, Cacti, WhatsUp Gold, and PingPlotter.

Network Administrator — *Nov 2018 – May 2019*
Dotnet Internet Services — Arifwala, Pakistan

- Engineered full network infrastructure from ground up; achieved 1 year uninterrupted uptime for 5,000+ users across 20+ remote sites.
- Configured dual-upstream BGP peering with auto-failover; managed APNIC IP registry, created ROAs for 4 x /23 prefixes, and administered RADIUS auth for 5,000+ users.
- Built redundant switching via fiber optic and Ubiquiti wireless backhaul (AirFiber, PowerBeam, LiteBeam); managed GPON OLT for last-mile connectivity.
- Deployed 4-node VMware ESXi cluster with Veeam Backup and monitoring stack (SolarWinds, Nagios, PRTG) for proactive fault detection.
